A school is a building of four walls . . .

. . . with tomorrow inside

Education is a social process . . .

Education is growth . . .

Education is not preparation for
life; education is life itself

John Dewey

It is not enough to have a good mind.

The main thing is to use it well.

Descartes

The world stands aside to let anyone
pass who knows where he is going.

David Starr Jordan

I thank the Lord for the people I have found . . .

Elton John

Having a friend is being needed . . .

and no matter how far apart you are . . .

it's knowing you are close in heart.

Efficiency — The right man in the right place
at the right time doing the right thing.
in the right way . . .

American youngsters tend to live as if adolescence were a last fling at life

rather than a preparation for it.

Success is to be measured not so much
by the position that one has reached in life

as by the obstacles which he has overcome
while trying to succeed.

Booker T. Washington

Use what talents you possess;
the wood would be very silent if no birds sang there

except those that sang best

The most wasted day of all . . .

. . . is that on which we have not laughed.

Yesterday is already a dream,
and tomorrow is only a vision;

but today well-lived

makes every yesterday a dream of happiness
and every tomorrow a vision of hope.

I find the great thing in this world
is not so much where we stand
as in what direction we are moving.

Oliver Wendall Holmes

We should all be concerned about the future

because we will have to spend the rest of our lives there.

SPORTS

The harder you work,
the harder it is to surrender

CHESS

Every profession from the highclass world of Wall Street to Fester and Fester Plumbing Co. of East Overshoe, has its own jargon, unintelligible to the layman, which is solely for the purpose of confusing the general public. The same is true in the game of chess. It is the story of John Perciballi's encounter with a female opponent on Board 3 against Wilmington.

It was all out right from the beginning. She was putting the moves on Perci, who tried to keep his cool and let her play her little game. This led to some fascinating developments. It soon became clear that Perci intended to seize the initiative. This led to an engrossing "Middle Game", in which both parties demonstrated some unusual tactical ploys. She struggled vigorously but was unable to refute Perci's somewhat unorthodox advances. Perci tightened his bind, forcing her to submit.

Perhaps the story would be better if there were some intricate mating combination to describe, but it was not meant to be. As far as Perci was concerned, this sort of thing was a one shot affair, and he left the scene grinning at his latest conquest.
